PROJECT –ABSTRACT

RealTime Collaboration — Code Together is a real-time collaborative code editor where multiple users join a single room and write, run and discuss code together, like Google Docs for code. A user creates a room and shares the Room ID; others join with their name and every keystroke syncs instantly in a VS Code-like editor with syntax highlighting. The editor supports running JavaScript, Python, Java and C++ inline, with user list, typing indicator and voice chat for coordination. It is built with Next.js, React, Socket.io, Monaco Editor and Chakra UI.
